

Please enter the following paragraph at the beginning of the specification:

– Cross Reference

This application is a continuation of co-pending U.S. Patent Application Serial No. 10/107,421 filed on March 28, 2002, which will become U.S. Patent No. 6,665,025, which is a divisional of the U.S. Patent Application Serial No. 09/401,963 filed on September 22, 1999, which has now become U.S. Patent No. 6,473,146. –

In the Claims:

Please cancel claims 1-12 without any disclaimer or a prejudice.

Please add new claims 13-17 as follows:

1-12. (Currently cancelled)

13. (New) A display device comprising :

a mold frame including a series of optical sheets;

a bottom chassis assembled to said mold frame;

a top chassis assembled to said mold frame;

a display panel positioned between said bottom chassis and said top chassis;

a printed circuit board (PCB) connected to said display panel; and

a grounding protrusions formed on said PCB.

14. (New) The display device according to claim 13, wherein said mold frame accommodates a lamp assembly and a reflector.

15. (New) The display device according to claim 14, wherein said display panel is positioned onto said optical sheets.

16. (New) The display device according to claim 15, wherein said PCB is connected to said display panel via a tape carrier package (TCP), and fixed to said bottom chassis by a fixing means.

17. (New) The display device according to claim 16, wherein said grounding protrusions are formed on said PCB where a signal transmission pattern is not formed.
